Postman

LANGUAGES

Hebrew - native

English - professional

EXPERIENCE

Backend developer at SmartyApp

2025-2026

- Collaborated with a team to build a fully custom WhatsApp bot from the ground up using TypeScript, with complete backend integration with Meta's official API.
- The bot received Meta's official verification and approval.
- Analyzed business requirements and contributed to key architectural decisions throughout the project.

COURSES

Backend Development Course

2025

- Built REST APIs, managed databases, and learned scalable architecture design.
- Hands-on work with Spring Boot, Docker, Swagger, Kafka, and Python.

EDUCATION

BSc of Software Engineering, "Jerusalem College of Technology"

2020-2023

GPA: 90

- Selected Courses: Algorithm Analysis & Complexities | Data Mining | Big Data | Neural Networks and Deep Learning | Introduction to AI | Software Engineering | Full-Stack Web Development

PROJECTS

Allergen Identification through Image Processing 2022 |

- Developed a mobile app that detects allergens in food products by analyzing ingredient lists from photos.
- Using Python in conjunction with Kivy framework.

Full-Stack Web Development Projects (Self-Learning)

- Learned and applied full-stack development skills independently.
- Collaborated effectively within a team environment.
- Utilizing JavaScript, React.js and Node.js.

Management system for managing a Bus Company 2021 |

- Created with C# and WPF.
